## EXPLANATORY NOTES

### RAMS USED

*Please note:* In addition to 'Rams Used" disclosed in the Flock Histories, some members have also used rams bred within the flock.

### DESIGNATIONS USED IN FLOCK HISTORIES

- **(AC.BR)**

The letters (AC.BR) appearing beside a flock in the Flock Histories, indicate that the flock is Accredited Brucellosis Free with the respective Department of Agriculture. The Department of Agriculture in each State can provide the current AC.BR status of any flock on request and intending purchasers should avail themselves of this free service.

- **(LP)**

The letters (LP) appearing beside a flock indicate that the Flock is recorded with LAMBPLAN - the National genetic evaluation and improvement system for sheep breeds used in lamb production.

- **(SS)** Indicates flocks recorded with Stockscan.

- **(PS)** Indicates flocks recorded with Primescan.

*Editors note:*

- Flocks claiming "AC/BR" had to lodge a current accreditation certificate.
- Flocks claiming "LP" status have not been cross-checked with LAMBPLAN.
- Flocks claiming "SS" status have not been cross-checked with STOCKSCAN.
- Flocks claiming "PS" status have not been cross-checked with Primescan.

*Disclaimer.*

# BREED TYPE STANDARDS

## CORRIEDALE BREEDER'S AIM

The Corriedale Breeder's aim is to produce a dual purpose sheep combining maximum clean fleece weight, body weight and fertility, having regard to the breed type standard.

### 1. General Appearance

The Corriedale should at once give the impression of being a well-woolled and evenly balanced sheep, with a remarkably hardy constitution, the ram being of a distinctive character and bold outlook. Being a dual-purpose sheep, consideration should be given to both wool and carcase.

### 2. Wool

The Corriedale carries a heavy, even, bright fleece of good quality with a long dense staple, pronounced crimp, soft handle and an even tip. For visual appraisal purposes, the object quality should be within the range of 50-58 spinning count and emphasis must be placed on quality.

The characteristic of a pure Corriedale sheep is a remarkable evenness in the length, density and quality of the fleece throughout. In males, the purse should be covered with wool.

*Note:*

As feeding, age, sex and health have a marked influence on the average fibre diameter of a fleece, a strict limit cannot be included in the Type Standard. However, as a guide, the mean fibre diameter of the fleece under average grazing conditions should be in the range of 25-32 microns. (Mature rams slightly broader, ewes slightly finer).

### 3. Body Structure

- (a) **Head:** Hornless, broad, strong and well-woolled, but free from wool blindness. Black or blue spots on the ears are no defect, but black or brown spots on hair or wool are defects. The jaw and bit should be broad, teeth well formed and meet the upper pad at the front. Nostrils preferably dark. Ears thick and soft.
- (b) **Neck:** Broad and strong, forming a good scrag and long enough to provide good balance.
- (c) **Brisket:** Carried well forward and wide.
- (d) **Back:** Long, level and broad.
- (e) **Ribs:** Well sprung and deep.
- (f) **Hindquarters:** Deep, broad and well muscled.
- (g) **Legs:** Moderate length with heavy bone and squarely set under the sheep. Coloured fibres are a serious defect. Hoofs well formed and preferably dark.
